A screenshot of the 'Shop Setting Distribution' menu. The 'Recommendation Item Setting' option is highlighted with a red box. Below the menu, there is a summary table for Shop A. A large blue arrow points down to the 'Recommendation Item Setting' screen.

The 'Recommendation Item Setting' screen shows a list of pharmaceutical products with their general names, manufacturers, and recommendation status (A, B, C, Non-recommendation). A note on the right side explains that by setting recommendations, stores can unify their procurement and prevent surplus even if other stores take them. It features a cartoon character holding a key.
